

# Top React Libraries and Tools You Need

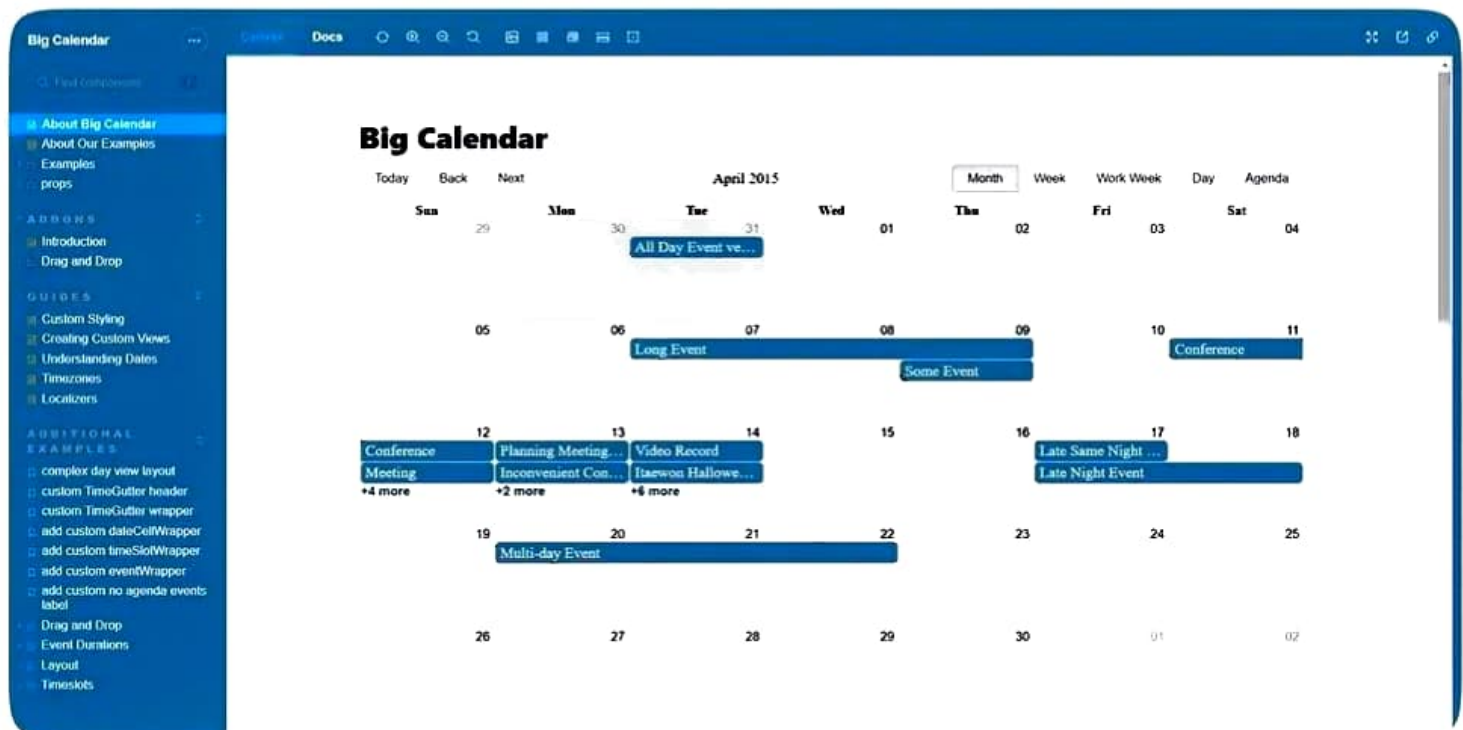

JavaScript Mastery

# React Big Calendar

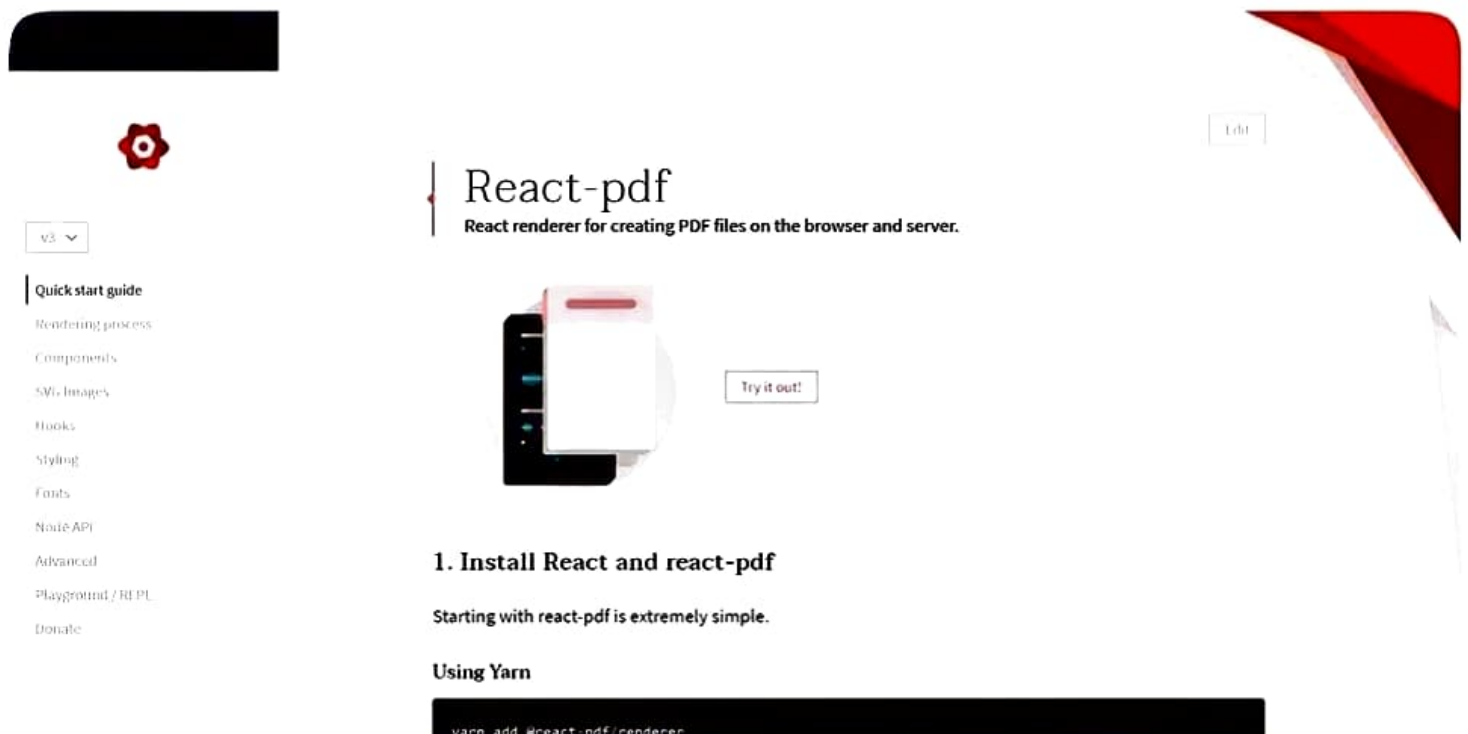

It is a powerful and flexible event calendar library for React apps. It provides an intuitive and customizable interface to display events, schedule appointments, and manage time slots, making it ideal for building robust scheduling and calendar applications.

# React PDF Renderer

It is a library that enables you to render and display PDF documents directly within your React apps. It provides a straightforward way to integrate PDF viewing capabilities, allowing users to interact with and navigate through PDF content seamlessly.

# Recharts

A charting library that simplifies the process of creating stunning data visualizations in React. With an extensive set of pre-built chart components & a straightforward API, Recharts enables devs to craft beautiful and responsive charts with minimal effort.
